

從混沌到洞見：SRAF 智慧代理人框架

(From Chaos to Insight: The SRAF AI Agent Framework)

駕馭非結構化資料，實現可追溯的智慧分析
(Taming Unstructured Data for Traceable Intelligence Analysis)

NotebookLM

挑戰：資訊洪流中的情報失焦

(The Challenge: Losing Focus in a Flood of Information)

大量非結構化文本

Daily reports, intelligence summaries, and alerts create an unmanageable volume.

檢索與關聯困難

Critical information is buried, making it nearly impossible to connect related events manually.

分析耗時費力

Analysts spend their time on low-level data wrangling instead of high-level strategic thinking. Manual synthesis is too slow to keep pace.

NotebookLM

我們的解決方案：SRAF - 自動化的智慧分析引擎

(Our Solution: SRAF - The Automated Intelligence Engine)

SRAF 將海量原始文本，轉化為**可查詢**、**可視覺化**、**可追溯**的結構化知識庫，並由 AI 代理人自動生成深度分析報告。

(SRAF transforms massive raw text into a **queryable**, **visualizable**, and **traceable** knowledge base, with AI agents automatically generating in-depth analytical reports.)

NotebookLM

實力展示：AI 代理人即時問答
(Power in Action: Live Q&A with the AI Agent)

「最近 3 個月 095 核潛艦活動情況？」
("What is the activity of the Type 095 nuclear submarine in the last 3 months?")

在最近 3 個月內，資料庫**未顯示** 095 核潛艦的任何偵測紀錄。最近的報導均為 **2025 年 6 月**，已超出查詢時間範圍。

(In the last 3 months, the database shows **no detection records** for the Type 095 submarine. The most recent reports are from **June 2025**, outside the query range.)

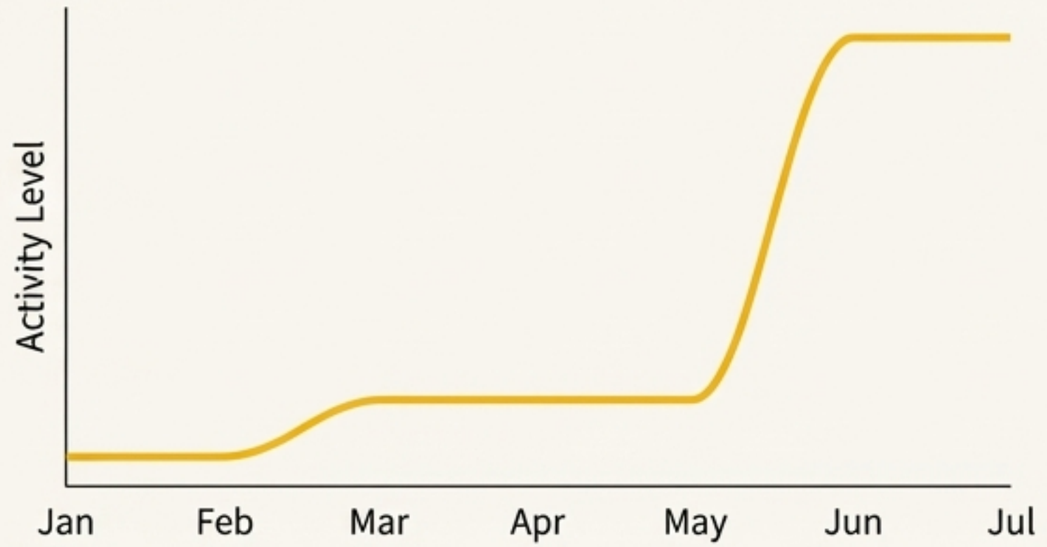

*答案精確、誠實，且附帶來源驗證 *(Answer is precise, honest, and comes with source verification.)*

NotebookLM

超越問答：跨領域的自動化洞察

095 核潛艦活動趨勢

年初低活動 → 6 月快速上升 → 6 月中後期持續高頻率

SRAF 架構解析：三階段智慧引擎

Stage 1: 結構化萃取 (Structured Extraction)

Unstructured Text → **LLM 資訊萃取** → Structured JSON

Stage 2: 知識庫建構 (Knowledge Base Construction)

Structured JSON → **Elasticsearch 資料庫** → Searchable Event DB

Stage 3: 代理人分析 (Agentic Analysis)

User Query → **AI 代理人** → Synthesized Report + Citations

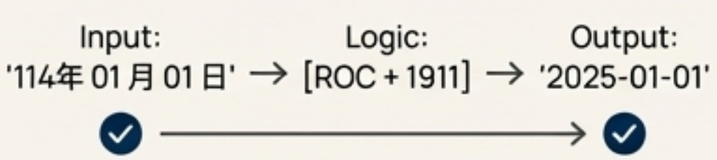

Source Concept: 基於 SRAF 架構之軍事情報分析 AI 代理人 SRAFM NotebookLM

深度解析 (1)：將文本煉成黃金的「提詞工程」
(Deep Dive 1: The Prompt Engineering That Turns Text into Gold)

我們用一套嚴謹的規則框架（MULTIDIM_EXTRACTION_Rule），教會 AI 如何像專家一樣思考思考，確保輸出的絕對一致性與準確性。

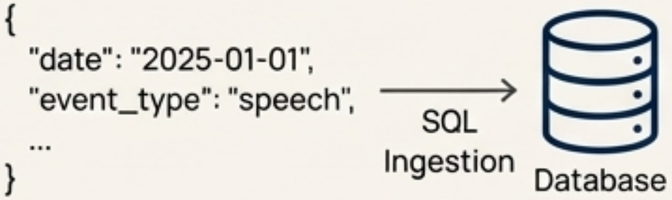

精準日期判讀 (Precise Date Parsing)

Inter
Differentiates 'Republic of China' years and resolves 4-digit ambiguities (e.g., is '0724' a date or a time?).

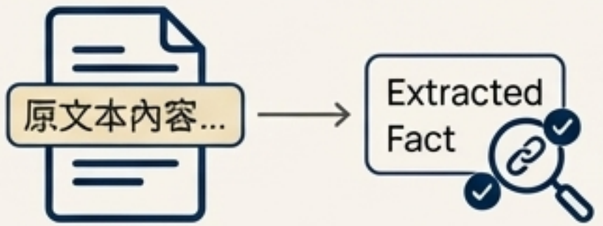

{ } SQL-Friendly 輸出 (SQL-Friendly Output)

Guarantees all
Guarantees all outputs conform to a strict schema, ready for direct database ingestion and analysis.

逐字證據擷取 (Verbatim Evidence Extraction)

Ensures every piece of analysis is supported by an an's original"emy text snippet, preventing hallucination.

NotebookLM

深度解析 (2)：具備「可追溯性」的 AI 分析師
(Deep Dive 2: The AI Analyst with Traceability)

1. **1. 工具調用 (Tool Use):**
   Agent queries Elasticsearch for all relevant structured events.

2. **2. 綜合推理 (Synthesis & Reasoning):**
   LLM receives the structured data to synthesize, compare, and identify trends.

3. **3. 附帶引用 (Citation Generation):**
   Every statement in the final report is appended with a link and snippet from the original source documents.

Visual Proof (視覺證明):

NotebookLM

規模化實力：以三萬筆模擬軍情文本驗證
(Proven at Scale: Validated with 30,000 Simulated Intel Documents)

30,000
documents

Simulates two distinct, real-world intelligence formats: "情勢摘要" (Situation Summaries) and "聯合情監偵回報" (Joint ISR Reports).

SRAF 成功將全部文本處理為結構化資料，為全方位的自動化分析奠定了堅實基礎。

NotebookLM

SRAF 的核心優勢：一場分析範式的轉移
(The SRAF Advantage: A Paradigm Shift in Analysis)

For Management & Decision-Makers

- **效率躍升 (Efficiency Leap):** Automates report generation, freeing analysts to focus on high-value strategic judgment.
- **決策品質 (Decision Quality):** Decisions are based on comprehensive, data-driven insights, not scattered information.
- **可信賴的 AI (Trustworthy AI):** 100% traceable citations completely eliminate AI 'hallucinations' and build confidence.

For Technical & Analytical Teams

- **釋放資料潛力 (Unleash Data Potential):** Transforms unstructured text from a liability into a programmable, queryable asset.
- **加速研究週期 (Accelerate Research Cycles):** Reduces analysis time from days of manual consolidation to seconds of instant queries.
- **穩固的架構 (Robust Architecture):** Built on the scalable and powerful Elasticsearch core.
